Gigamon Premium Training

Exclusive Global Training Provider

As a founding member of Gigamon's selective Premium Training Provider Program and their exclusive global content provider, Fast Lane offers Gigamon security training that provides active visibility into physical and virtual network traffic leading to improved security and optimized performance. Through our hands-on training, you will learn about Gigamon's Visibility Fabric™ and GigaSECURE®. This is the industry's first Security Delivery Platform that allows you to deliver cutting-edge intelligence ensuring that security, network and application performance management solutions seamlessly operate.

Gigamon Offerings

All Gigamon offerings are available for Private or Public seat training delivered live in classroom, live online, live onsite at your location or our unique live FLEX option (combination of classroom and online).

Rapid Prototyping · Mentored Install · Shadowing · Webinars · Roadshows · Hackathons · Test Drive · Customer Engagement Workshop · Staff Augmentation

NEW: Introducing Gigamon Training Vouchers

Fast Lane is proud to announce the introduction of Gigamon Training Vouchers (GTVs). In cooperation with Gigamon, this new program supports both Gigamon's Customers and Partners training needs. This pre-paid training voucher program is valued at $100 USD per voucher and can be used to purchase authorized Gigamon training including standard Gigamon Courses as well as Consultative Gigamon Training solutions offered by Fast Lane. The purchase of GTVs makes it easy to include and pay at the time of the purchase.

Purchasing GTVs
You can purchase GTVs directly from Fast Lane in support of a solution purchase from Gigamon. If you are working with a Gigamon Channel Partner, they can now sell you GTVs which can be used to order and purchase authorized Gigamon training from Fast Lane.

Redeeming GTVs
To redeem GTVs, simply supply the order/invoice number that reflects the GTVs purchased. To attend a 2-day Gigamon class priced at $1995 USD, 20 GTVs will be required. If you do not have enough GTVs to cover the purchase, you can supplement the difference via other acceptable payments (for example, credit card, PO, etc.).

Multi-Vendor Training Solutions

Fast Lane has established many strategic partnerships, several of which are also Gigamon ecosystem vendor partners. These relationships allow us to offer joint training solutions to meet your specific needs.

Consultative Training

Learning from an experienced technical professional is paramount in being able to be effective with new skills quickly. Fast Lane has enhanced the typical private training experience with our Consultative Training solution. With this new combination of consulting and training we have a solution that gives you both in a very efficient and cost effective means to accelerate your project and Time To Market.

When you book a Consultative Training event your Consultant will interview you to ascertain your technical and business objectives and then define 1-3 days of custom deliverables (i.e. architecture audits, technology reviews, gap analysis, best practices guidelines, etc.) as an extension of your standard training event.
*   NEW: Consultative Training: Expert For Hire (1 day)
*   NEW: Consultative Training: Expert For Hire (1/2 day)
